

Events under the aegis of ERASMUS +
through the internal project

Project name:

Innovative Student-Centred Learning (SCL) Practices fueled with
ITC-tools and ***university – industry cooperation*** towards
reinforcement of
Business & Engineering Entrepreneurships education

”InoLearn 4 BEEs”

Event for multiplying the results achieved in

Intellectual Output (IO3) results

**Innovative digital platform for Intercultural Student -
Centered Learning (e-platform with intercultural SCL
experiences)**

Name of the E3 Multiplication Event

*Embracing digital transformation in Business,
Engineering and Entrepreneurship education through
innovative e-platform with intercultural SCL
experiences*

Coordinator: University of Ruse "Angel Kanchev"

Contents

1. Subject of dissemination of results – multiplication event
2. Purpose of the project
3. Proposed and obtained results

1. Subject of dissemination of results – Multiplication Event

Intellectual IO3 outcome proposed:

Innovative digital platform for Intercultural Student - Centered Learning (e-platform with intercultural SCL experiences))

Activities carried out:

- ✓ develop the functionalities of innovative e-platform facilitating students' personalized learning experiences
- ✓ expanding creative thinking and intercultural synergies.
- ✓ test and improve innovative learning pedagogies, methods and tools
- ✓ exposing students to a rich personalized ITC-based environment
- ✓ fine tune the e-platform by capitalizing on experiences from testing phase,
- ✓ exploiting the whole potential of university-business cooperation within the intercultural and digital contexts.

1. Subject of dissemination of results – Multiplication Event

Intellectual IO3 outcome proposed:

Innovative digital platform for Intercultural Student - Centered Learning (e-platform with intercultural SCL experiences))

Expected results of the E3 Multiplier Event

- ❖ increased sense of initiatives in digitally transformation of teaching and learning practices in business, engineering and entrepreneurship education
- ❖ enhanced professional environment outside the partnership with good practices exchange flows
- ❖ raised awareness about the EU common values and of the European project

1. Subject of dissemination of results – Multiplication Event

Intellectual IO3 outcome proposed:

Innovative digital platform for Intercultural Student - Centered Learning (e-platform with intercultural SCL experiences))

Expected results of the E3 Multiplier Event

- ❖ stronger link between the world of education and the world of work with capacity to generate further improvements for lasting effects
- ❖ increased synergies across different syllabus and disciplines in BEE education areas through the aid of digital transformation
- ❖ improved communications and intercultural skills and people-to-people contact.

2. SCOPE OF THE PROJECT

Improving the critical and digital thinking skills of students in business engineering and entrepreneurship by developing, testing and improving INOVATORY STUDENT-CENTERED LEARNING PRACTICES

- ☑ Facilitating the adoption of intercultural and civic attitudes
- ☑ Exploiting and using ICT learning potential
- ☑ International cooperation and partnerships between universities and industry

3. OBJECTIVES OF THE PROJECT

01. Transform existing teacher-centred culture into students-centred learning (SCL) approach

IO1. proposed result: *Joint Methodological Guide for Student - Centered Learning (Joint methodological Guide for SCL)*

02. Capacitate and elevate the students' innovative knowledge, entrepreneurship & digital skills

IO2. proposed result : *Innovative Toolkit with Intercultural Student-Centered Learning Resources (Ino - Toolkit with intercultural SCL resources)*

03. Stimulate and enhance the digital skills and critical thinking of students based on exploiting the innovative SCL Practices

IO3. proposed result: *Innovative digital platform for Intercultural Student - Centered Learning (e-platform with intercultural SCL experiences)*

04. Spread out and multiply the results and benefits of the innovative SCL Practices

IO4. proposed result: *Best Practices Handbook for Intercultural Student – Centered Learning (Best practices Handbook for intercultural SCL)*

4. Proposed and obtained results

4.1. Organizing Focus Group sessions with practitioners and professionals from the chosen industry to help identify, define and develop a guide with:

- ❑ real-life problems of the business/industry sector as a basis for case studies
- ❑ relevant achievements in the sector – as a basis for best practices/examples of cases
- ❑ challenges and opportunities – as a basis for project-based scenarios and applications.

4. Proposed and obtained results

4.2. Organizing dissemination sessions with practitioners and professionals from different industries for knowledge and:

- ❖ analysing, testing and improving SCIL intellectual resources
- ❖ creating stakeholder feedback and recommendations

THANKS
